## **About the show:**

This conference brings together hose manufacturers, end users, material suppliers and researchers for a 360° view of a product that is critical in industrial, automotive, hydraulics and many other applications.

## **What makes Fulflex a Preferred Supplier to the hose manufacturing industry!**

We are a custom mixer and calendering operation that is currently serving many industrial and specialty customers. We have many years of experience in providing customized solutions. Our extensive preforming capability and proximity to east coast customers (for materials with shelf life issues) helps them optimize their operations.

Recent consolidation in the custom mixing industry has resulted in minor to significant changes in pricing as well as service levels.

- Fulflex has over 85 years in mixing and calendering specialty color compounds for exacting requirement of our customers in the medical, hygiene, industrial and automotive sectors
- As we consume the majority of our products in house, we are uniquely fitted to meeting your color and cleanliness specifications
- Our plant in Brattleboro, Vermont uses no free carbon black and meets GMP requirements of our customers in Pharma and Medical sectors
- With excellent process and quality assurance we can provide batch to batch consistency required for any of your challenging compounds
- Our thin film calendering capabilities provide competitive advantage to our customers in form of improved yield and excellent quality
